Getting Clean Environmentally...

Little Green Machine is dedicated to providing a range of ecologically sound products in an easy to obtain and cost efficient manner. As part of this, most of our products are sourced from well-known environmentally friendly organisations that you may have heard of!

For example, Ecover's commitment is epitomised by the world famous Ecological Factory, a clean running plant built largely from recycled and recyclable materials, it even has a grass roof! The factory is designed to run energy efficiently with minimum environmental impact
